Grapegrowing

- 8 Susceptibility of tablegrapes to black spot (anthracnose) disease
- 12 Grape phylloxera: new investigations into the biology of an old grapevine pest
- 18 The impact of fungal infection on the grapevine's capacity to respond to water stress
- 24 Soil compaction in vineyards – friend or foe?
- 32 Representative sampling at the grape intake: A critical issue - often forgotten
- 38 The influence of three rootstocks on vine performance, composition and the wine sensory properties of early, mid and late maturing clones of Pinot Noir in 2005 and 2006
- 41 Winery wastewater treatment for vineyard irrigation re-use

Winemaking

- 46 Effect of storage conditions on the determination of chemical composition in red grape homogenates and white grape juice
- 53 Malolactic fermentation and wine flavour: changes in the volatile composition of red wine following malolactic fermentation with four commercial strains of *Oenococcus oeni*
- 62 The importance of Green: sensory and chemical analyses of New Zealand Sauvignon Blanc
- 70 A preliminary survey of red grape total soluble solids, total anthocyanin, tannin and crop yield from Sunraysia vineyards
- 74 An overview of the phenolic chemistry of white juice and wine production

WineTech Preview

- 81 WineTech Preview
- 86 WineTech Exhibitors Listings

Business & Marketing

- 100 An industry in ferment: Reconfiguration in the international wine landscape
- 105 Financialisation in the world wine industry: a limit to industrial consolidation?
- 110 Differentiation or inertia: A critical look at the Australian wine industry
